

# ENERGY POWER™ EM-2.1

## TAKES UP VERY LITTLE SPACE

The Energy Power™ EM-2.1 multimedia speaker system will fit just about anywhere. Two small satellite speakers can sit on either side of your laptop, monitor or almost anywhere else on your desk or in your cubicle. The subwoofer is also small enough to fit on your desktop so it doesn't wind up on the floor taking up foot space under your desk or creating a wiring mess.

## GREAT SOUND FROM A SMALL SYSTEM

Don't let its diminutive size fool you; the Energy Power EM-2.1 will sound great whether you're listening to music or watching your favorite shows or movies on your computer. The subwoofer has controls for both bass and system volume.

## EASY PLUG AND PLAY SETUP

Just plug both the speakers and your computer with the included cables into the back of the subwoofer, plug it in, turn up the volume and you're ready to go. The standard 3.5 mm input will also allow you to connect almost any portable music player.
