interference received, including interference that may cause undesired operation. In accordance with FCC requirements, changes or modifications not expressly approved by Thomson Inc. could void the user's authority to operate this product. This device generates and uses radio frequency (RF) energy, and if not installed and used properly, this equipment may cause interference to radio and television reception.

If this equipment does cause interference to radio or television reception (which you can determine by unplugging the unit), try to correct the interference by one or more of the following

 Re-orient the receiving antenna (that is, the antenna for the radio or television that is

"receiving" the interference).

• Move the unit away from the equipment that

• Move the unit away from the equipment that is receiving interference.
• Plug the unit into a different wall outlet so that the unit and the equipment receiving interference are on different branch circuits. If these measures do not eliminate the interference, please consult your dealer or an experienced radio/television technician for additional suggestions. Also, the Federal Communications Commission has prepared abolts il booklet "How To Identify and Resolve abolts" il booklet "How To Identify and Resolve. helpful booklet, "How To Identify and Resolve Radio TV Interference Problems." This booklet is available from the U.S. Government Printing Office, Washington, DC 20402. Please specify stock number 004-000-00345-4 when ordering

# Wake Function

#### SmartSnooze™ Operation

This operation allows extra sleep time after the wake function is on. The alarm will be off by pressing SNOOZE, NAP SLEEP, ◀◀ REV or FWD ►► until the snooze period is over. Snooze function can be used repeatedly up to 30 minutes (default: 9 minutes).

Set the "quiet" period as follow:

1 Press and hold SNOOZE

quiet period. The time decrements or increments will follow by a faster rate when you press and hold the buttons

Press WAKE - # J OFF 1 or 2 repeatedly or

**Switching Off Wake Function** 

# Sleep Function

In sleep mode, you can set the duration (up to 2 hours) before the radio turn off

1. Press and hold **SLEEP** on the top of the the duration up to 2 hours (default: 59 min). The time decrements or increments will follow by a faster rate when you press and hold the buttons Note: The radio will be switched on.

2. To check the remaining duration before the radio turns off, press and hold **SLEEP**. To cancel the sleep function, press **SNOOZE** or **OFF**.

Tips: You may also set sleep mode to auxiliary audio source. Connect the auxiliary source (e.g. mp3 player) and press RADIO/AUX twice to select AUX mode after sleep time is set. However, the auxiliary source cannot be turned off by the unit. Tips: You may also set sleep mode

### **Important Information**

**For Your Safety** 

The AC power plug is polarized (one blade is wider than the other) and only fits into AC power outlets one way. If the plug will not go into the outlet completely, turn the plug over and try to insert it the other way. If it still does not fit, contact a qualified electrician to change the outlet, or use a different no. Poo net attempt to howest this

different one. Do not attempt to bypass this

**For Your Records**

batteries every 2-3 years.

Switching Band Slide the **AM/FM** switch on the back of the unit to select AM or FM band.

**Tuning the Radio** Turn the **TUNING** knob on the right of the

unit to adjust radio frequency. Radio frequency shows on the display.

**FM Antenna** 

The power cord acts as your FM antenna. The power cord picks moderate to strong stations and eliminates the need for ar external antenna in most strong signal areas. Be sure the power cord is stretched out to its full length. Changing position of the power cord may improve reception

Built-In AFC

The Built In Automatic Frequency Control (AFC) works only on FM. It helps reducing drift on FM reception and keeping the

**AM Antenna** A built-in ferrite rod antenna eliminates the need for an outside antenna for AM reception. Rotating the unit slightly may

improve reception of distant AM stations.

adio locked in on the FM station to which

it is tuned. When tuning in FM stations, you may notice

that the station you are tuning can

be well-tuned on two or three nearby

points on the dial. Always tune carefully

Power is fed to the unit even when it is not functioning. To cut the power supply off, the power cable must be unplugged.

**Power Failure Indicator** When AC power is interrupted (disconnected)

for a short period of time, both time and

alarm settings will change (unless batteries

are installed) After AC nower is restored

reconnected), the Digital Display will blink to indicate that power was interrupted and you should readjust the time and alarm settings.

**Listening to Auxiliary Source** 

Connect your auxiliary source (e.g. mp3 player) to the AUX input jack on the right side of the unit. Turn on the unit and your auxiliary source

Press RADIO/AUX to switch to listen to auxiliary source. The AUX indicator on the front display will turn on. Press again to switch back to listen to the radio.

# **Auto Brightness Control**

Clock time and radio frequency are display on the display area at the front of the unit. The display brightness can be adjusted automatically by analyzing the intensity of surrounding light sources.

Slide AUTO DIMMER on the back of the unit

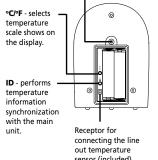

# **Thermometer**

#### Line Out Temperature Sensor If you are going to install the thermometer outdoor with extre

temperatures (below 14°F (-10°C)), the use of line out temperature sensor (included) is recommended to avoid battery failure. Insert the sensor connector to the recepto (below ID button) in the battery compartment. The sensor wire should be extended from battery compartment through the hole at the lower left of the

Back view with battery comp
