

Slim and Sensational

Don't let the slim profile of the JAMO S606 fool you.

Behind the sleek, elegant front you will find a potent combination of loudspeaker components that generate truly impressive sound.

With a 25 mm (1") dome-tweeter with coaxial WaveGuide and 2 high-power 127mm (5-1/4") midrange drivers mounted on the front, this speaker looks elegant and is easy to place in any room.

Take a closer look and you will notice the side-firing 200mm (8") woofer mounted in a rigid, ported enclosure for maximum low-frequency performance.

The Jamo S606's come in mirror-image pairs for the best possible acoustic interaction with your listening room. Plus, you can fit them with spikes or tune them up with bi-wiring to tweak the sound further.

Pretty rich for such a slim box, right?
