

## News Release

### OMEGA Introduces the New ECHO-1 One-Button / Two-Way Upgrade Kit

**Douglasville, Georgia – Sept 16, 2013** – Omega Research and Development Technologies, Inc. is introducing more product! Coming this fall Omega will be shipping the new ECHO-1. The ECHO-1 is a 2-way one button remote upgrade kit that can be added to the RS-150-EDP+ or any ECHO compatible one button Excalibur remote start system. This allows the customer to get an audible and visual confirmation when they start their car or unlock their door.

“With the extended transmitting range of our 1-way systems, it can be difficult to tell if the car is running or not” says Shawn Cooper, Tech Support Manager for Omega “With the ECHO-1 added to the remote start, the customer can now get verification that the START command was successful and the car is running, without having the bulk or expense of a full featured 2-way security system.”

The ECHO-1 features mute mode, runtime expiration warning, up to 1500 ft transmitting range, and a replacement antenna with a built in valet button for easy programming and status LEDs to display the system’s status.

#### **About Omega:**

Omega Research & Development Technologies has been an innovative leader in the vehicle security industry for over 40 years. Since its founding in 1971, Omega's product line has diversified to include remote start modules and other vehicle accessory products. Omega's most recent product offerings include the exciting new technologies of telematics, wireless and databus integration.

With the vision of the founder, Kenneth Flick, guiding the company, auto security systems remain the central focus of Omega Research & Development Technologies. In 1995, Omega became the only company in the keyless entry arena with a technology designed to prevent crime due to unauthorized transmitter access to vehicle systems. The patented technology, **Unauthorized Transmitter Alert**, promises to revolutionize the industry. Consumers can now have instant knowledge of any unauthorized access to their keyless entry systems. Most of the product lines manufactured by Omega are equipped with Unauthorized Transmitter Alert technology.

Omega's mission, as it was over four decades ago, is to provide reliable, leading-edge security and automotive accessory products at a competitive price.
