

## News Release

### OMEGA Is Now Shipping The New ECHO-4 Two Way Upgrade Kit

**Douglasville, Georgia – June 12, 2013** – Omega Research and Development Technologies, Inc. is now shipping their new ECHO-4 two way upgrade kit. The ECHO-4 will allow you to upgrade the ECHO compatible Excalibur “EDP/EDPB”, Crime Guard ” i6-i8”, or K-9 “EDP” alarm with a new two-way B&W LCD remote. The ECHO-4 remote has a new sleek design along with a much larger easy to read LCD display, and bigger easy to use buttons. The new display will show visual system status, time, and remote battery life. The built in piezo and vibrate motor can be selected to confirm arm, disarm, and remote start operations. It will also alert you if the alarm is triggered while you are within the range of the vehicle. The ECHO4 gives you up to 1500 feet of operating range.

“During the design process Omega incorporated several features to increase the durability such as a recessing the LCD screen to help prevent a cracked display due to impact and a partial metal frame offering years of trouble free service” says Shawn Cooper, Product Development for Omega Tech.

#### **About Omega:**

Omega Research & Development **Technologies** has been an innovative leader in the vehicle security industry for over 40 years. Since its founding in 1971, Omega's product line has diversified to include remote start modules and other vehicle accessory products. Omega's most recent product offerings include the exciting new technologies of telematics, wireless and databus integration.

With the vision of the founder, Kenneth Flick, guiding the company, auto security systems remain the central focus of Omega Research & Development Technologies. In 1995, Omega became the only company in the keyless entry arena with a technology designed to prevent crime due to unauthorized transmitter access to vehicle systems. The patented technology, **Unauthorized Transmitter Alert**, promises to revolutionize the industry. Consumers can now have instant knowledge of any unauthorized access to their keyless entry systems. Most of the product lines manufactured by Omega are equipped with Unauthorized Transmitter Alert technology.

Omega's mission, as it was over four decades ago, is to provide reliable, leading-edge security and automotive accessory products at a competitive price.
