

## News Release

### OMEGA Is Set To Release the New the ECHO-4HR

*Product availability December 2013*

**Douglasville, Georgia – December 16, 2013** – Omega Research and Development Technologies, Inc. announced that it is now shipping the new ECHO-4HR upgrade kit. The ECHO-4HR will allow you to upgrade your compatible “Hyper Range” Excalibur EDP / EDPB / & Crime Guard i7 / i8 model units (indicated by a Green connector on the window-mount antenna), with a new 2-way B&W LCD remote that’s boasts up to 1-mile transmitting range.

The ECHO-4HR remote has the same sleek case design as the ECHO-4 with the larger, easy to read LCD display, and bigger easy to use buttons. The display will show system status, time, and battery life. The built in piezo and vibrate motor can be selected to confirm arm, disarm, and remote start operations. It will also alert you if the alarm is triggered while you are within the 1-mile range of the vehicle.

“The ECHO-4HR allows the customer to upgrade to a Hyper Range 2-way remote with an easy to understand LCD pictograph screen” says Shawn Cooper, Tech Support Manager for Omega.

The ECHO-4HR will be shipping soon so be sure to contact your Omega representative and get you orders in today.

#### **About Omega:**

Omega Research & Development Technologies has been an innovative leader in the vehicle security industry for over 40 years. Since its founding in 1971, Omega's product line has diversified to include remote start modules and other vehicle accessory products. Omega's most recent product offerings include the exciting new technologies of telematics, wireless and databus integration.

With the vision of the founder, Kenneth Flick, guiding the company, auto security systems remain the central focus of Omega Research & Development Technologies. In 1995, Omega became the only company in the keyless entry arena with a technology designed to prevent crime due to unauthorized transmitter access to vehicle systems. The patented technology, **Unauthorized Transmitter Alert**, promises to revolutionize the industry. Consumers can now have instant knowledge of any unauthorized access to their keyless entry systems. Most of the product lines

manufactured by Omega are equipped with Unauthorized Transmitter Alert technology.

Omega's mission, as it was over four decades ago, is to provide reliable, leading-edge security and automotive accessory products at a competitive price.
