

## Unpack

Make sure you have the following items in your 808 EarCanz TRU Sport package:

- 808 EarCanz TRU Sport Bluetooth earbuds
- Micro USB charging cable
- Eartips in 3 sizes
- Travel pouch

If you have any questions about this product, visit [808Audio.com](http://808Audio.com) or call our toll-free help line at 1-800-732-6866.

## 1. Charge the EarCanz TRU Sport

For best performance, we recommend you charge your EarCanz TRU Sport earbuds fully before using them.

Open the **DC IN** flaps on the bottom of each earbud.

Plug the micro-USB ends of the included USB charging cable into the charging jack behind the **DC IN** flap on each earbud.

Plug the other end of the charging cable into a USB power source (like a computer or a USB charger).

The indicator light on the bottom of each earbud turns red while that earbud is charging. It turns white when the earbud is fully charged.

## 2. Turn on the EarCanz TRU Sport

Unplug the USB charging cables when the earbuds are charged.

**To turn on the EarCanz TRU Sport earbuds:**

Right and left earbuds (inside)

Place each earbud in its assigned ear (marked R or L on the inside of each bud).

Bend the earhooks around the back of your ears so that each earbud is comfortably secured in and on your ear.

**TIP:** You can use the right earbud by itself as an earpiece for Bluetooth calls. Just turn it on by itself (and leave the left earbud off).

Press and hold the **▶** button on the top of **each** earbud until the earbuds announce “power on.”

The earbuds will link for wireless stereo first—in several seconds they announce “left connected” and “right connected.”

**If you don't hear “left connected” and “right connected”:** Turn the earbuds off (press and hold the **▶** button until they say “power off”). Then turn them both back on again.

Give a quick double press to the **▶** button on the **right** earbud to start the pairing process (the right earbud says “pairing”).

**To turn the EarCanz TRU Sport off:** Press and hold the **▶** button on one of the earbuds for 3 seconds.

## 3. Pair + Connect

Enable Bluetooth on your smartphone or other device.

Choose **808 TRU Sport** from the pairing options on your smartphone. (If it's not in the list, choose “Scan” from your phone's Bluetooth menu.)

**IMPORTANT:** If you've previously paired your phone or other Bluetooth device with these earbuds, the earbuds will automatically attempt to reconnect to that device when you turn them on. If you want to pair to a new device, give a quick double press to the **▶** button on the top of right earbud (the earbud announces “pairing”) to put the earbuds in pairing mode.

The earbuds announce “device connected” when the process is complete.

*Continues on other side...*

### 3. Pair + Connect (continued)

**Note:** The process of enabling Bluetooth and connecting varies from device to device. See your device's owners manual for more information and specific instructions.

#### Bluetooth Wireless Connection Tips

- Make sure the Bluetooth capability of your device is turned on.
- The earbuds' Bluetooth wireless connection works up to a range of roughly 33 feet (10 meters). This range may vary, however, based on other factors, such as room layout, wall material, obstacles, your device's Bluetooth performance, etc. If you're having problems connecting to the earbuds, move closer to your phone.
- Make sure your device supports audio transfer A2DP.
- If your device asks you for a password to connect, use "0000".

#### To pair the EarCanz TRU Sport again

After turning your earbuds back on, they automatically attempt to reconnect to the last connected device. If they don't (or if the last connected device is not available), double press the ▷ on the right earbud to activate pairing.

### Using the EarCanz TRU Sport

#### Putting the EarCanz TRU Sport in your ears

The EarCanz TRU Sport earbuds come with medium-sized eartips installed. You can use different-sized tips, but first try them with the mediums.

Find the L and R markings on the buds. Place each earhook over each ear as shown here. Then place each tip in each ear. Finally, bend each earhook so that it fits snugly over the outside of each ear with the tips in place.

If the tips don't fit, follow the directions in the next section to change them.

#### Changing the eartips

If you want to use different size eartips, remove the pre-installed eartips from each earbud. Then find the pair in the size you want, and push each tip onto each bud until it's secure.

#### Listening to music

Set your device's volume for music to 50%.

**Note:** This is to make sure the sound from the earbuds isn't too loud when you start streaming.

Start playing music or other audio on your device. Within seconds, the earbuds start streaming the audio wirelessly via Bluetooth.

#### Controlling playback and volume

The top of both earbuds have a play button (▷) to control playback. The top of the right earbud also has volume controls.

**To play/pause music:** Press the ▷ button on either bud.

**To adjust volume:** Press the + or - button on the right earbud.

**To go to the previous/next song:** Press and hold the + or - button on the right earbud.

#### Answering/ending phone calls

The right earbud has a built-in microphone, so you can use it for phone calls. Your phone will ring through the earbuds when you're receiving a call. You can answer and end the call wirelessly from the right earbud.

**To answer or end a phone call:** Press the ▷ button.

**To decline a phone call:** Press and hold the ▷ button.

**IMPORTANT:** Not all phones support playback control and phone answer/end control. Check your phone's user manual for more information if you're having trouble with these functions.
