

ENERGY POWER[®]
SERIES

ENERGY

YOU HAVE THE REST OF YOUR LIFE TO COMPROMISE

The Energy Power® Series instantly upgrades your sound system without requiring a receiver. Just plug in and stand back. The power is undeniable.

The soundbars include the Convergent Source Module Technology, the foundation of every Energy speaker. It delivers wide dispersion, low distortion and flat frequency response. Translation: huge sound that's also acutely accurate.

Crank up the volume. Feel pure Energy.

RE-EVALUATE YOUR ENTIRE MOVIE COLLECTION

Build a theater room in two steps or less with the 40-inch Energy Power Bar Elite that connects directly to your TV. Meanwhile, the 10-inch wireless, side-firing subwoofer lurks elsewhere.

Program your TV remote or use the one provided to turn surround sound on or off. With all the cables included for digital optical and RCA inputs, you'll have your new system set up before the popcorn is fully popped.

ADD SOME DIMENSION TO YOUR FLAT PANEL

The 30-inch Energy Power Bar packs a mean punch. Two channels of sound and an 8-inch, down-firing subwoofer make any screen jump off the wall.

The remote control learning feature allows the easy-to-install-and-use system to function via your existing TV controller.

Saying the Energy Power Bar is an upgrade from your current flat panel speakers is like saying a sports car is faster than a moped.

RATTLE YOUR POTS AND PANS

From the kitchen to the dormitory, the bedroom or the man cave, the Energy Power Bar One brings the entire package—including the necessary pieces for easy installation.

This 30-inch cabinet comes complete with built-in subwoofers and all the highs and lows at an affordable price. It's a true testament to the beauty of both sound and simplicity.

GAIN A NEW SENSE OF RESPECT FOR YOUR COMPUTER

The Energy Power EM-2.1 lends credibility to the little volume controls on your keyboard. Just plug the tiny-but-powerful sub into the wall and hook the speakers into the sub.

Rock your playlist, take in a movie or disappear into the world of online gaming with a single input jack. You can also play your mp3 player directly through the same jack.

They may look small, but they mean business.

CHANCES ARE YOUR ROOM COULD USE A DUSTING

Shake things up with the Energy Power 10 Sub and Energy Power 12 Sub. No fight scene is complete without the final, crushing blow. And no home theater system is complete without feeling it in your gut.

With line and speaker level inputs, you can easily connect to almost any system and bring depth to your living room.

SPECIFICATIONS	ENERGY POWER BAR ELITE	ENERGY POWER BAR	ENERGY POWER BAR ONE
Speaker System	2-way soundbar with 10" wireless subwoofer	2-way soundbar with 8" wireless subwoofer	2-way soundbar with built-in subwoofers
